

AI & Design

A hands-on session on using AI for design — and building your own brand you can reuse forever. Free tools first; you'll leave with something real.

🕒 Session 1 · 9:30 AM – 12:00 PM

🕒 Session 2 · 1:00 – 3:30 PM

👤 Facilitators: Suhavi & Aditya

🆓 Free-tools-first

📍 In person · bring a laptop

You are the Creative Director. AI is your genius intern.

Brilliant, fast, well-read — but junior. It does its best work when you brief it well, hand it references, and give feedback instead of expecting one-shot perfection. Everything we'll build today will come back to this one idea.

A What we'll cover

We'll teach a concept, then build with it straight away.

15
MIN

Cold open & the frame

Something stunning, made free in 3 minutes. We'll set the promise for the session and meet the "genius intern."

20
MIN

Meet your intern

How AI actually thinks — predicting text, building images from noise, why it's not a search engine. Just enough to direct it well, plus a quick terminology round.

20
MIN

The brief BUILD #1

Anatomy of a great prompt — role, task, context, constraints, format, examples. We'll look at a before/after, then you'll rewrite one weak prompt into a Creative-Director brief.

15
MIN

Why your intern goes dumb

Context windows, drift mid-project ("lost in the middle"), and hallucination — what causes them and the simple fixes. We'll show it live.

5
MIN

Break BREAK Grab a coffee — back in 5.

15
MIN

The toolkit

A free-first stack mapped to real design jobs — what each tool is for, phone-friendly picks, and an honest one-slide "Pro Path" for when you go client-facing. (Full tool list on page 2.)

45
MIN

The build: Brand-in-a-Box HANDS-ON

The core of the session. Strategy → visual identity (palette, fonts, a logo concept) → voice → apply it to one real artifact → save it as a reusable brand block you can hand any AI tool, forever.

10
MIN

Gallery walk

A few of us will share our brand — and one thing the AI surprised us with.

5
MIN

Take it home

How to keep the brief reusable forever (free & paid), a one-line note on responsible use, and your takeaway kit.

The AI tools we'll use

Most of these have a real free tier — plenty to learn and draft with. Explore widely, then keep the few that fit how you work. 📱 = works well on a phone.

THE JOB	WHAT WE'LL USE	WHAT IT'S FOR IN THE SESSION
Write & ideate	ChatGPT · Gemini · Claude 📱	Brainstorming, names, brand strategy & voice, and rewriting prompts into strong briefs.
Make images	Gemini ("Nano Banana") · ChatGPT · Leonardo 📱	Generating visuals, mood, and logo concepts. (Free image outputs can be public — don't use sensitive material.)
Assemble & finish	Canva 📱	Where you actually build it — templates, social posts, and fixing AI's approximate colours to exact hex.
Vibe-code a website	Lovable · Bolt	Describe the site in plain words; the AI builds the pages, layout and copy for you to tweak and publish.

Others...

Slide decks	Gamma	Fast first-draft decks — limited lifetime credits and a watermark.
AI video	Runway · Google Veo	Short clips from a prompt — trial / limited free credits, not ongoing.

🔍 **Two things to watch with "free":** ① it can mean a **daily reset** (sustainable) or **one-time lifetime credits** (a trial — e.g. Gamma, Runway, Veo). ② free exports often carry **watermarks or a vendor subdomain**. Free is perfect to learn & draft; pay one tier (~\$15–20/mo) only when it goes client-facing. **Limits drift — we'll confirm exact numbers live.**

B What you'll walk away with

🎯 Your own brand

Positioning, personality, colours, fonts and voice — captured, not just imagined.

📄 A reusable brand block

A copy-paste header you drop on top of any prompt so the intern always knows who you are.

📝 A prompt cheat-sheet

The brief recipe + ready-made prompts for strategy, palette, fonts and a logo concept.

🗺️ The free-tool map & ethics card

The full table above, plus a one-page note on using AI responsibly.

⚠️ **One ground rule:** never paste personal, patient, or confidential data into a consumer AI tool — free outputs can be public, and policies vary. We'll cover this properly at the close.
